

Limagrain Thailand

Data Sheet

LG38619

Product Description

LG38619 is a new generation hybrid developed by Limagrain. It is short to medium maturity, heavy grain/field cob weight, big & uniform ear, good grain color and easy to harvest.

Suitability

LG38619 is suitable in various geographies which have fertile soil and good management conditions. Yield can be optimized in prolonged growing conditions such as Highland and Dry Season (Irrigated) or corn after rice across regions.
