

Limagrains Thailand

Data Sheet

LG38778

LG38778 is a wide adaptation hybrid with medium to long maturity. With long, strong stand in the field and a high and stable yield, LG38778 is easy to harvest.

LG38778 is more suitable at high land and mountainous areas because of its good long stand ability and cob and stalk insect tolerance

Grain Colour	Orange
Grain texture	Flint
Kernal Rows	12-14
Shelling%	81%
Maturity	120-150days
Plant Height	210-240 cm
Ear Height	105-120 cm
Husk Cover	Very Good

Key Features

- Easy to harvest
- Less insect damage
- Good grain colour
- Strong stalk
- Drought tolerance
