

Limagrains Thailand

Data Sheet

SA282

SA282 is a short to medium maturity hybrid that helps growers achieve a flexible cultivating in crop/season rotation. SA282 has clean cobs, high 2 ear ratio, is easy to harvest, and gives a high and stable yield.

SA282 is most suitable for areas that need a short maturity period for crop rotation such as river banks, vegetable planting and diplodia disease areas, because of its short maturity and disease tolerance.

Grain Colour	Orange
Grain texture	Flint
Kernal Rows	12-16
Shelling%	82%
Maturity	103-112 days
Plant Height	200-220 cm
Ear Height	105-115 cm
Husk Cover	Very Good

Key Features

- **Double Cropping**
- **Early Maturity**
- **Leaf Disease Tolerance**
- **Drought Tolerance**
- **Good grain and ear colour**
